PROJECTS

E-Commerce Website [Link](#)

- Developed a fully responsive and user-friendly e-commerce platform that allows users to browse, search, and purchase products online.
- Technologies used: HTML, CSS, JavaScript, React.js
- Implemented product filtering, sorting, and pagination features for enhanced user experience.
- Used RESTful APIs to fetch and display real-time product information and reviews.

Power BI Landing Page [Link](#)

- Created an interactive web application that fetches and displays country data, including population, using a public API.
- Technologies used: HTML, CSS, JavaScript, Fetch API.
- Integrated REST Countries API to display country details such as name, population, capital, and region.
- Users can search for a country, and the application dynamically updates the information.
- Implemented a Dark Mode toggle for better user experience, allowing users to switch between light and dark themes.
